

## Safegrounds case history proforma

This simple proforma is intended to capture case studies to be used on to the Safegrounds website that highlight experiences and lessons learnt for a project your organisation has been involved with.

Project details (e.g. location, size, timescale)		
Contaminants of concern		
Media of concern (e.g. soil, groundwater, rock, manmade structures)		
Technologies used		
In-situ  Ex-Situ  <i>Tick as appropriate</i>	Conventional  Innovative  <i>Tick as appropriate</i>	Description
Aim of the Project (indicating any performance targets)		
Summary of why this approach was the preferred choice		
Approaches considered and summary of why these were rejected		
<b>Considered</b>		<b>Reasons why rejected</b>
Stakeholder groups involved (issues arising and how these were managed)		

Stakeholder	Issues
Liability Holder	
Regulator - HSE(NII)	
Regulator – EA/SEPA	
Local Authority	
Local Liaison Group	
NGO's	
Others	
<b>Health and Safety Issues during implementation</b>	
<b>Environmental Issues during implementation</b>	
<b>Authorisations required (e.g. Planning Permission, Discharge consents etc)</b>	
<b>Summary of performance</b>	
<b>Wastes generated and disposal route</b> <i>(list of types, volumes, and type of disposal e.g. Drigg Landfill etc )</i>	

Verification requirements
Project successes, failures and lessons learnt
